

IDS Version 1.2 Un-Install Instructions

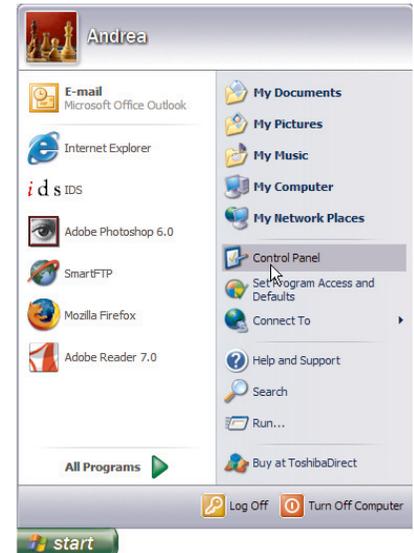

It is best to uninstall ALL versions of IDS from your Computer System before installing NEW IDS 1.2.

Uninstalling IDS Version 1.0

1. Click on **START** from your Windows Menu Bar - at the lower left hand side of your screen.

2. Select **CONTROL PANEL** from the Menu Options.

Note: For 98 or ME users, click on **SETTINGS** options and then select **CONTROL PANEL**.

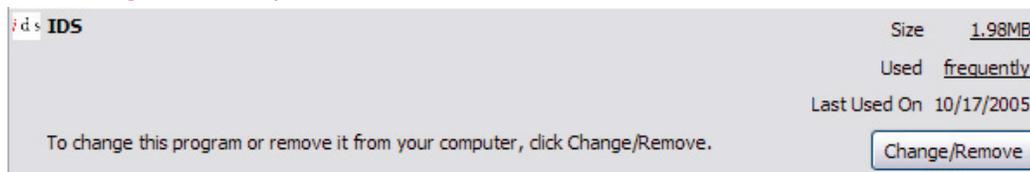

3. Select the Add/Remove Option from the Control Panel Interface.

Note: Make sure that you are viewing the Control Panel Interface in Classic View.

4. Locate the IDS Listing on the interface and click on the Change/Remove Button.

HINT: The listings are in alphabetical order.

5. The IDS Install Shield window will open with 3 options: Modify, Repair, or Remove.

6. Select the Remove option to uninstall IDS Version 1.0 from your system.

7. When this is complete, close the Control Panel and any other Windows Dialog box that is open and **Restart your Computer**.

You must restart your computer to ensure that the Installation of IDS Version 1.2 is completed correctly.
